

[illegible]

The drawing is a detailed architectural cross-section of a residential building. It shows the internal structure, including the roof, walls, floors, and foundation. The roof is gabled with a pitch of 35° = 70.02%. The drawing includes various annotations for materials, dimensions, and construction details. Key features include:

- Roof:** Gabled roof with a pitch of 35° = 70.02%. The roof structure is shown with rafters and a waterproofing layer. The roof is finished with ceramic tiles.
- Walls:** The walls are shown in cross-section, with various layers of insulation and structural elements. The walls are finished with plaster and paint.
- Floors:** The floors are shown in cross-section, with various layers of insulation and structural elements. The floors are finished with tiles or other flooring materials.
- Foundation:** The foundation is shown in cross-section, with various layers of insulation and structural elements. The foundation is finished with concrete.
- Windows and Doors:** The drawing shows the internal structure of windows and doors, including frames and seals.
- Stairs:** A staircase is shown in the center of the drawing, with a pitch of 35° = 70.02%.
- Annotations:** The drawing includes numerous annotations for materials, dimensions, and construction details. These are organized into lists and tables, providing a comprehensive overview of the building's construction.

The drawing is a technical drawing, intended for use by architects, engineers, and construction professionals. It provides a detailed view of the building's internal structure, allowing for a better understanding of the construction process and the materials used.
